

**Project Value**  
**£2.3 million**

**Contractor**  
**ISG**

**Client**  
**Cheshire West and Chester  
Council**

**Architect**  
**Tweed Nuttall Warburton**

**Start**  
**February 2012**

**Completion**  
**April 2013**

**Classroom extensions and refurbishment at three schools in the Winsford and Rural district as part of the council’s Basic Needs Programme**

- Works were undertaken at Aston by Sutton Primary School, Byley Primary School and Winsford High Street Community Primary School
- All three sites took part in the Considerate Constructors Scheme, achieving an average score of 36 out of 40
- The contractor value engineered initial design proposals to reduce costs and time to meet the client’s budgetary requirements. This totalled £230k across the three sites
- 116 tonnes of site waste was diverted from landfill with materials reused creatively on site where possible
- The contractor held a ‘Bird House Day’ for pupils to interact with wildlife. The pupils named 12 bird boxes which were fitted to the trees, attracting nesting robins
- Based on project success at Winsford the contractor was awarded extra works to create two new Multi-Use Games Area pitches and relocate mobile classrooms

“The best thing about ISG has been the community spirit and communication, which is allied with the fact that the children are friendly and really want to be involved. The workforce has also been excellent on site. It’s a beautiful building with so much light and space.”

**Chris Abbott, Head Teacher, Aston by Sutton Primary School**
